

Critical Evaluation of Evidence – Slide Transcript

Slide 1:

You will each be given a short description of Assertive Discipline theory.

In your groups, consider the theory's strengths and weaknesses. Think about how this theory might work, and under what conditions. Also think about how this theory might present challenges, and under what conditions those challenges might arise. Write these down as you go, along with your justifications of your insights, and be prepared to share this with the class following the groups discussions.
