

Critical Thinking in Everyday Life – Slide Transcripts

Slide 1:

From these three images, please pick your favourite image. It doesn't matter what reason you have for choosing this, but you need to pick one image that you prefer over the other two.

Slide 2:

In your groups, you need to agree on three specific things that make your image better than the other two images. This means you should be able to identify three things in the other images that you like *less* than your preferred image. You also need to justify why you're making that judgment – for example, if you like the colour more, *why* do you like the colour more?

To reiterate, your group is looking for three specific things that make your image preferable. I'll put the images back up now.
